WORK EXPERIENCE

4th Generation (2023 Mar to 2023 Jul)

Position: Digital Marketing and Technical Support Intern

Industry: Property / Real Estate

– My role was to support the team with their technical concerns and manage the Facebook Meta Business account, where I created advertisements using the Meta Business Suite platform to promote real estate properties. I was also tasked with developing a webpage for 4th-generation trading services.

WORK EXPERIENCE

Seaversity, Inc. (2023 October to 2023 December)

Position: Back-end Developer

Industry: Technology, Information and Media

– In my role as a back-end developer, I contributed to the development of a system in PMMA that aimed at creating a smart campus, streamlining manual processes. Throughout this experience, I acquired substantial expertise. I excelled in Laravel PHP framework, API development and effectively managed Git repositories, utilizing Bitbucket for collaborative work. My proficiency extended to a deep understanding of Git commands and their functionalities. Additionally, I expanded my skill set by actively working with Vue.js and TypeScript that significantly contributed to my tasks.

EDUCATION

2023 Aug

Bachelor's/College Degree

Cavite State University - Main Campus (CvSU Indang)
Field of Study: Information Technology

2017 Apr

Senior High School Diploma

University Of Perpetual Help System Dalta - Las Pinas
Field of Study: Technical-Vocation-Livelihood Track (TVL):
Information & Communications Technology (ICT)

PROJECTS

OrthoMagic Dental Clinic (Web-Based):

- This system was a commissioned project, and I developed its back-end based on the provided workflow.
- I used VS Code as my development environment and utilized HTML, CSS, JS, PHP, and MySQL as the database.

Dormitory Management and Log Monitoring System with QR Code for Cavite State University (Web-Based):

- This system was our capstone project. Our capstone project consisted of two members, and I served as the programmer, responsible for developing the entire program and system flow.
- It was selected for presentation at the 1st CEIT Research Colloquium in Cavite State University Main Campus.
- I used VS Code as my development environment and utilized HTML, CSS, JS, PHP, and MySQL as the database.

YourDay Social Media (Web-Based):

- This system was our project, which involved four team members. I served as the back-end programmer and was responsible for creating the system flow.

4th Generation Consumer Goods Trading (Web-Based):

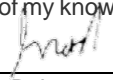

- I developed this webpage during my internship when my manager instructed me to create a webpage for their trading services.
